ATTENTION CONTRACTORS

An important message from the
LOUISIANA STATE LICENSING BOARD FOR CONTRACTORS
Residential Specialty Classifications
Effective January 20, 2016

Licenses for six new specialty classifications are now required for those residential subcontractors who bid or perform work that exceeds \$7,500, including labor and materials, on any new single family residential home, duplex, triplex or fourplex.

The new specialty classifications are:

- Residential pile driving
- Residential foundations
- Residential framing
- Residential roofing
- Residential masonry/stucco
- Residential swimming pools

Contractors requesting these specialty licenses must complete an application for licensure; pass both the Business and Law, and the specialty trade exam; and provide proof of current liability and workers' compensation insurance coverage.

Subcontractors performing work under any specialty above for homeowners who are building their own home must be licensed for that specialty.

A subcontractor who works under the direct supervision of a licensed residential building contractor may obtain a subcontract-labor-only specialty classification by:

- Completing and submitting an application
- Submitting an affidavit executed by a licensed residential building contractor that attests to the subcontractor's quality of work and character
- Passing the Law, Rules and Regulations exam
- Providing proof of current liability and workers' compensation insurance

Electrical, mechanical and plumbing work in excess of \$10,000 requires a license issued by this Board.
