PRESS RELEASE - FOR IMMEDIATE RELEASE

Due to the inclement winter weather, the Verdine water plant is on temporary generator power and we are issuing a precautionary boil advisory as well as asking residents to conserve water for the North and Northwest portions of Sulphur. As of now, this advisory is for residents west of Beglis Parkway.

The boil advisory is being issued as a precaution due to the potential for additional impacts from the winter storm. We recommend that residents take precaution and boil water before consumption. Boil water for one (1) *full* minute in a clean container. The one-minute starts after the water has been brought to a rolling boil. (The flat taste can be eliminated by shaking the water in a clean bottle, pouring it from one clean container to another, or by adding a small pinch of salt to each quart of water that is boiled).

The City of Sulphur will notify residents as soon as the boil advisory has been rescinded.
